

Demystifying play-based learning (PK - Y2)

Presented by Dr Michael Nagel - professor, teacher and author; regarded as one of Australia's foremost experts in child development.

Dr Michael Nagel explores the exciting world of brain science and examines how scientific evidence about the brain can be used to guide practice, whilst observing the evidence behind the importance of play.

This session also includes an introductory presentation by our education consultant on play-based learning through Walker Learning pedagogy.

Dr Michael Nagel is an Associate Professor, Teacher and Academic at a leading Queensland university in the areas of cognition and learning, human development and early learning, neurological development in children & adolescent psychology. He is a member of the prestigious International Neuropsychological Society and is a national and international speaker.

IN THIS SESSION WE WILL:

- > Explore the theory of play and why play is fundamental for education
- > Discover innovative ways to add value to the teaching of literacy, numeracy, STEM and life skills.
- > Provide strategies for children to explore learning through investigations which link to explicit teaching of all curricular areas.
