This session focuses on the variety of ways literacy and numeracy can be strengthened and deepened during investigations. We examine how literacy and numeracy links are made through planning and documentation, and how explicit instruction continues during formal teaching throughout the day.

A range of practical strategies and ideas are covered to assist educators in providing additional and meaningful literacy and numeracy into the school day.

Great ideas on how to embed literacy and numeracy in early childhood education, a must PD for all early primary educators.
