Presented by World Renowned Guest Presenter, Michael Nagel PhD and our Senior Walker Learning Education Consultant.

Join Dr Michael Nagel and Walker Learning for this exciting session where we explore the world of brain science and examine how scientific evidence about the brain can be used to guide practice, whilst observing the evidence behind the importance of play.

In this session we will build participants knowledge of:

- Brain development and research
- Temperament/personality
- The importance of attachment and relationship
- The implications for teaching and learning
- The importance of a stimulating play environment
- The principles of Active Learning

This session includes an overview by our Education Consultant of practical strategies on how to implement a play – based and personalised learning pedagogy. The core principles of Walker Learning engages children with hands on investigative learning.

A copy of the educator text “Early Childhood Play Matters” (by Walker & Bass / ACER Press) will be included in this presentation. (RR \$55)

This PD Event is suitable for teachers and educators working with children aged birth to eight years of age.
